This Restricted-Access Syllabus is brought to you for free and open access by the Education Syllabi 2016 at Exhibit. It has been accepted for inclusion in Education Syllabi Spring 2016 by an authorized administrator of Exhibit. For more information, please contact exhibit@xavier.edu.
Course Description

**Purpose**

To provide educational administrative candidates an overview of the educational operational activities as they relate to the school district as well as the building. To assist them in being better prepared for the decision making and task implementation related to the business affairs of operating a school facility. In addition there will be an emphasis on all the financial topics related to school funding, budgeting and processes related to the district’s business operations.

**Course Objectives**

I. To provide an overview of the topics, tasks, issues and concerns related to the business operations of the school district and its facilities.

II. To promote an awareness of the complexity and key management functions involved in the business operations of the school district at the building level.

III. To encourage students to recognize the impact of facility design and facility upkeep on student achievement.

IV. To provide students the opportunity to become familiar with school construction as it relates to determining need, developing design, and the building process.

V. To develop the student’s appreciation of the synergistic systems that exist in a school district and how they interact to establish the business culture of the district/building.

VI. To provide students with an in depth view of federal, state and local funding and the impact of the accounting and reporting related to the district financial processes.

**Instructional Objectives**

1. To prepare students to become more efficient and effective in dealing with operational issues so as to free more time for instructional leadership activities.

2. To encourage students to understand and appreciate the vital role non certified employees play in creating and maintaining a positive educational environment.

3. To develop student’s ability to evaluate non certified school/district staff.
To help students understand the impact of the building business culture on the success of the school.

To help students become better operational related decision makers by creating a building culture that encourages input, manages and defines that input and make effective and efficient decisions based on quality tools.

To encourage students to maintain a view of the big picture as it relates to their building operation and district decision making.

To help students better understand the working relationships among the superintendent, treasurer and board.

To help students better understand the funding mechanisms related to generating funding levels that meet or exceed district needs.

To introduce students to all financial process and procedures in place to meet local, state and federal funding and expenditure requirements.

To help students become more knowledgeable of sound, acceptable accounting procedures that enable districts to maintain an acceptable level of fiscal confidence from its community.

To enable students to understand the building administrators role in the creation of the building/ district budget.

To provide an overview of the development of the district appropriations and enhance their ability to understand all key components.

To help students better comprehend the impact of federal, state and local rules and regulations on the school facility operations and finances related to those operations.

To provide students with a first hand view of the operational activities of a school building as they relate to transporting students, feeding students, and maintaining the building.

To help students understand the importance that technology will play in the business affairs of the district.

To help students gain an understanding of the role of the treasurer and the business manager of the school district.

Provide students the avenues for securing information and contacts that will assist them in the successful operation of their school / district.

Students will be made aware of the various insurance coverage’s that are required of a school district and the numerous issues and concerns that that relate to their implementation.

Students will recognize the importance of developing reliable and enforceable school security plans. They will become familiar with the key components of successful plans.

To provide students with the opportunities to see new school facilities and understand the construction process.

To expose students to vocabulary that relates to building maintenance and construction to enable them to have a better understanding of the process and terms involved.

To examine with the students all the phases of the design and construction process.
23. To review with students the roles of the owner, architect, and construction manager in the school facility construction process.

24. To provide students with the opportunity to meet with design professionals and witness the use of the three dimensional imaging that is utilized in designing the school facility.

25. To provide students the background involved in recognizing facility needs and the steps involved in developing a facility master plan and timeline.

26. Encourage students to recognize the importance of long range facility planning and maintenance planning so that informed and realistic budget estimates can be incorporated into the district appropriations.

27. To provide students the information and tools to effectively assess their facility.

28. To share with students the key components involved in the successful integration of technology into the school facilities environment.

29. Introduce students to the local, state, and national organizations that provide support and network opportunities for school business officials.

### Instructional Strategies

- Make site visits to recently constructed school facilities.
- Provide question and answer opportunities throughout the course including opportunities to meet with and interact with financial personnel, design professionals, construction managers and contractors.
- Through sharing sessions enable students to hear experiences related to school business affairs and finances in neighboring schools and districts.
- Provide lecture material that relates real experience situations with school operational and financial activities.
- Use student participation activities to simulate evaluation procedures for non certified staff.
- Throughout each class meeting model the use of quality tools that can be utilized by school administrators to facilitate their operational activities and decision making.
- Provide professional reading activities that will enable students to access information regarding the financial and business operations of the school district/building.

### Course Outcomes

Students will be more aware of the topics, issues and concerns related to school business operations, facility design and school construction.

Students will be better prepared to handle the business related tasks that they will face as building and district administrators.
Students will demonstrate a better understanding of the terms and topics related to maintaining a school facility.
Students will have a better understanding of the role of the Treasurer and the financial processed related to funding and the establishment of the district budget, appropriation and financial reporting.

Students will have a deeper understanding of the role and the value of non certified staff.

Students will become familiar with the people involved in maintaining a school facility, designing a school facility and building a school facility. In addition students will understand the role of each of these people in successfully completing these tasks.

Students will understand and appreciate the impact that the business operations plays in the success of the school/district.

Students will have a better understanding of the role of the building administrator in the business affairs of the district and local facility.

**Evaluation or Assessment**

Mid term exam – site visit report
Final exam - preparation of interview questions / answers
Article summaries

**Grading**

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90 – 100%</td>
</tr>
<tr>
<td>B</td>
<td>80 – 89%</td>
</tr>
<tr>
<td>C</td>
<td>70 – 79%</td>
</tr>
<tr>
<td>D</td>
<td>60 – 69%</td>
</tr>
<tr>
<td>F</td>
<td>below 60%</td>
</tr>
</tbody>
</table>

**Attendance Policy**

Students are expected to attend and participate in all classes and site visits.

**Required Texts**

There is no required text. Students will receive hand out materials for each class. Also students will be directed to access information from various web sites.
Accommodations for Special Needs

It is my goal that this class be an accessible and welcoming experience for all my students. It you are a student with a disability who may have trouble participating or effectively demonstrating learning in this course, contact me to arrange an appointment to share your Accommodation Letters from the Disability Services and to discuss your needs. Disability related information is confidential. If you have not contacted Disability Services (located in the Learning Assistance Center) to arrange accommodations, I encourage you to so by contacting Cassandra Jones, by phone at 513-745-3280, in person on the Fifth Floor of the Conaton Learning Commons, Room 514, or via e-mail at jonesc20@xavier.edu as soon as possible as accommodations are not retroactive.
