This Restricted-Access Syllabus is brought to you for free and open access by the Mathematics Syllabi 2013 at Exhibit. It has been accepted for inclusion in Mathematics Syllabi Spring 2013 by an authorized administrator of Exhibit. For more information, please contact exhibit@xavier.edu.
MATH 212 – Geometry and Measurement – MCED
Spring 2013

Information
Instructor: Mrs. Sheila Doran
Office: 107 Hinkle
Phone: (513) 745-4244
e-mail: doran@xavier.edu (Make sure you DO NOT use dorans)

Office Hours:
Tuesday & Thursday 8:30-9:30 am
Wednesday 3:00-4:00 pm
Friday 9:00-10:30 am
Others by Appointment

The bookstore has a custom edition for Xavier University which contains only the geometry and measurement chapters. Because it is reduced, the student receives a large discount on price as compared to buying the complete text.

Course Description
This course is designed as a mathematics course for middle childhood education majors. The goal of this course is to develop a deeper understanding of the concepts of middle school geometry and measurement through exploration with concrete and visual activities, group discussion, routine exercises, and problem solving experiences. A deeper understanding requires a development of mathematical knowledge and skills along with mathematical reasoning. It is not just the ability to "do middle childhood mathematics" but to understand the topic well enough to analyze student work and to recognize how to assist and challenge a middle school student to grow in their understanding. It is also being able to see the connections of middle childhood geometry and measurement to early childhood and high school geometry and measurement.

**This course is a mathematics content course not a methods course. Therefore the focus is on the mathematics and not on teaching methods, although hopefully you will learn ideas for teaching within the study of the mathematics.

Course Student Learning Outcomes
As a result of this course, students will be able to:

1. Define, classify, and analyze properties of figures in the plane and in space.
2. Apply the process of measurement using units for length, area, volume, weight, mass, and temperature.
3. Generate and explain formulas for area and volume.
4. Explain the Pythagorean Theorem and apply it to methods of finding perimeter.
5. Analyze the rigid motion transformations of translations, rotations, reflections, and glide reflections, and design tilings of the plane using transformations.
6. Differentiate between reflection, rotation, point, and translation symmetry.
7. Use geometric constructions to develop properties of congruent and similar triangles.
8. Solve problems involving similar triangles.
9. Use The Geometer’s Sketchpad software to develop geometric properties.

**Grading**

Your final grade will consist of 4 tests, 1 journal score, and 1 Assignment/Quiz/Project average as listed below.

<table>
<thead>
<tr>
<th>Test #1:</th>
<th>Chapter 9 – Geometric Figures</th>
<th>16%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test #2:</td>
<td>Chapter 10 – Measurement</td>
<td>16%</td>
</tr>
<tr>
<td>Test #3:</td>
<td>Chapter 11 – Transformations and Symmetry</td>
<td>16%</td>
</tr>
<tr>
<td>Test #4:</td>
<td>Chapter 12 – Construction and Congruence</td>
<td>16%</td>
</tr>
<tr>
<td>Daily Journals</td>
<td></td>
<td>10%</td>
</tr>
<tr>
<td>Graded Assignments/Quizzes/Projects</td>
<td></td>
<td>26%</td>
</tr>
</tbody>
</table>

No grades are dropped. No extra credit is available. Projects/Assignments not turned in on the due date will have points deducted from the score.

I always try to get tests graded and back by the next class period. Therefore, if a test is to be missed for an unavoidable reason, arrangements must be made beforehand to make it up before the next class period.

**Daily Journals**

It is generally acknowledged that reflective practice is important to the growth and development of beginning teachers. Reflective writing builds self awareness of understanding, performance, and development in learning and teaching. Your journal is a daily writing (class days and any significant study days outside of class) of your personal reactions to your experiences during class (or study) meetings. It is not just a record of what was done in class. Think and reflect upon how your own understanding developed, how you felt about the work and why, problems, questions, and misunderstandings you had, how others (in group work) developed in their understanding, how you felt about your contribution to group work, etc. The journal writings should show evidence of thought and reflection. Access to the Daily Journal is under the Assignments tab on Blackboard.

**Grading Scale**

<table>
<thead>
<tr>
<th>Score Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>92-100</td>
<td>A</td>
</tr>
<tr>
<td>90-91</td>
<td>A-</td>
</tr>
<tr>
<td>88-89</td>
<td>B+</td>
</tr>
<tr>
<td>82-87</td>
<td>B</td>
</tr>
<tr>
<td>80-81</td>
<td>B-</td>
</tr>
<tr>
<td>78-79</td>
<td>C+</td>
</tr>
<tr>
<td>72-77</td>
<td>C</td>
</tr>
<tr>
<td>70-71</td>
<td>C-</td>
</tr>
<tr>
<td>68-69</td>
<td>D+</td>
</tr>
<tr>
<td>60-67</td>
<td>D</td>
</tr>
<tr>
<td>0-59</td>
<td>F</td>
</tr>
</tbody>

Class Helpful Hints

How to Do Well in this Course

• **Prepare for class** by reading the text and any other assigned reading, by working through the examples in the reading, and by preparing questions on the reading or assignments to bring to class.
• Do the homework assignments **early** so that you may ask for help before it is due.
• Ask for help early in the semester. Don’t wait until you are too far behind.
• Come in to my office with questions or problems on work done in class or on assignments.

Attendance

Attendance will be taken each class period either through the use of a sign-in sheet or by the instructor.

Cell Phones

Please turn all cell phones **off** during class (no texting, please). Cell phones must be away during tests. Bring a calculator other than your cell phone calculator.

Academic Honesty

Class policy for academic integrity listed below comes from the Xavier University Catalog entry on Academic Honesty. You may access the online Xavier Catalog at this web address: [http://www.xavier.edu/catalog](http://www.xavier.edu/catalog)

• All work submitted for academic evaluation must be the student's own.
• The direct and unattributed use of another’s efforts is prohibited as is the use of any work untruthfully submitted as one’s own.
• Penalties for violations of this policy may include one or more of the following: a zero for that assignment or test, an “F” in the course, and expulsion from the University.
