This Restricted-Access Syllabus is brought to you for free and open access by the Finance Syllabi 2015 at Exhibit. It has been accepted for inclusion in Finance Syllabi Spring 2015 by an authorized administrator of Exhibit. For more information, please contact exhibit@xavier.edu.
College Mission
We educate students of business, enabling them to improve organizations and society, consistent with the Jesuit tradition.

Course Description
The course is designed to develop the students' ability to value the business enterprise, and the financial claims against it, using a variety of valuation techniques.

Learning Outcomes:
Upon successful completion of this class, you will be able to
- Generate a set of pro forma financial statements for a business using excel;
- Determine an enterprise value using discounted cash flow and relative valuation techniques;
- Determine the intrinsic value of equity in publicly- and privately-held companies
- Develop a set of tools to measure the performance of an investment portfolio

Textbooks:

Class Prerequisite:
- The prerequisite for this class is a B- or better in FINC 300 Business Finance

Course Requirements:

- Attendance, Participation and Punctuality: Attendance at each class is expected. Class lectures complement, but do not duplicate, textbook information. A significant portion of your learning will accrue through the exchange of ideas in class. Active participation in class is expected and encouraged. Please be on time.
Course Requirements: (cont’d)

- **Quizzes and Homework**: Quizzes will be periodically given during the semester to gauge your progress in mastering course material. Some of the quizzes may be of the take-home variety. Homework is assigned below.

- **Valuation Report(s)**: The preparation of the Valuation Report(s), described below, is semester-long activity in which you will be asked to value the equity in two or more publicly-traded companies. This group Report will be due before the end of the semester and various stages of the report are to be presented in class.

- **Exams**: During the semester, you will be given two in-class exams, each covering all the material covered in the course up to the exam date.

- **Instructor Access**: My regularly-scheduled office hours are Tuesdays and Thursdays from 10:00 a.m. -11:15 a.m. I am happy to meet with you during those hours or by appointment at a time that is mutually convenient. You are welcome of course to just drop by at any time.

**Grades**: Your grade in this class will be determined by your class attendance and participation, valuation report and presentation, and performance on the two exams and quizzes. No extra-credit assignments will be given. Grades will be assigned according to the following grade scale 94-100, A; 90-93, A-; 87-89, B+; 84-86, B, 80-83, B-, 77-79, C+; 74-76, C; 70-73, C-; 57-59, D+; 54-56, D; 50-53, D-; 0-49, F. Each of these activities is assigned the following weights:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Weight (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attendance and Participation</td>
<td>10</td>
</tr>
<tr>
<td>Quizzes and Homework</td>
<td>5</td>
</tr>
<tr>
<td>Valuation Report</td>
<td>25</td>
</tr>
<tr>
<td>Exam 1</td>
<td>30</td>
</tr>
<tr>
<td>Exam 2</td>
<td>30</td>
</tr>
</tbody>
</table>

**Valuation Report**: The Valuation Report is to group project, to be prepared by groups of three to five students. Each group will be valuing two to four publicly-traded companies, preparing a written report (see report guidelines) and presenting various stages of your analysis to the class. This project is designed to apply the valuation techniques that we learn in class to real companies. Specific details and format of the report are to follow. You will be assigned by me to a group early in the semester. The group will be responsible for achieving certain milestones on a timely basis during the semester.

**Group Interactions**: It is expected that group members act professionally and treat the task at hand seriously. Project grades are determined by the quality of the analysis, the recommendation, and the presentations. However, at the end of the semester, each team member will be asked to evaluate the other members of the group. I will take group member evaluations of individual behavior into account when I assign points for the project and for participation.
Prerequisite for FINC 490 Portfolio Management I: Achieving a grade of \textit{B- or better} in this class is a prerequisite for FINC 490 Portfolio Management I. Firm Valuation serves as the foundation for Portfolio Management I, giving you the tools necessary to value stocks.

Miscellaneous Items:

- Miscellaneous readings, handouts, excel files will be posted to Canvas
- The Valuation Report is a semester-long team project. You will, however, be presenting pieces of the report to the class as the semester moves along.
- Miscellaneous dates
  - Tuesday January 13th: our first class
  - \textbf{Thursday February 26th: Exam 1}
  - Thursday April 2\textsuperscript{nd}: Easter Break (no class)
  - \textbf{Thursday April 23\textsuperscript{th}: Exam 2}
  - \textbf{Monday May 4\textsuperscript{th}: Final Valuation Reports due}
  - Thursday April 30\textsuperscript{th}: Final Group Presentations I
  - Monday - Friday, May 4\textsuperscript{th} – May 8\textsuperscript{th}: Final Exam Week
  - Tuesday May 5\textsuperscript{th}, 8:30-10:20: Final Group Presentations II
- The Group Presentations will take part on two different days: the last day of regularly-scheduled class and the final exam period on May 5\textsuperscript{th}. Attendance at group presentations is required.
- \textbf{Note that the date of Exam 1 is the Thursday before spring break.} Make your travel plans accordingly.
Group Project Milestones:

- **Step 1**: Pick your companies (Tuesday 27 January)
  - The companies are to be publicly traded
  - At least one firm is to be a manufacturing firm
  - At least one firm is to be a service firm
  - Avoid companies that have had losses for more than five consecutive years
  - Avoid financial services firms
  - Companies are to be approved by me.

- **Step 2**: Required Rate of Return (Thursday 12 February)
  - Compute the cost of equity for your companies
  - Compute the weighted-average cost of capital for your companies
  - Prepare a summary of the steps taken in your WACC calculation
  - Be prepared to present your WACC calculations to the class

- **Step 3**: Ratio Analysis (Thursday 19 February)
  - Conduct a DuPont Analysis on your companies
  - Be prepared to present your analysis to the class

- **Step 4**: Free Cash Flow to the Firm Valuation Model (Thursday 12 March)
  - Compute the Free Cash Flows to the Firm for your companies
  - Determine the drivers of value for each company
  - Perform a sensitivity analysis to determine how sensitive the values are to your input assumptions
  - Present the analysis to one of one of your companies to the class

- **Step 5**: Free Cash Flow to Equity Valuation Model (Tuesday 24 March)
  - Compute the Free Cash Flows to Equity for your companies
  - Determine the drivers of value for each company
  - Perform a sensitivity analysis to determine how sensitive the values are to your input assumptions
  - Perform a sensitivity analysis to determine how sensitive the values are to your input assumptions

- **Step 6**: Relative Valuation (Thursday 9 April)
  - Evaluate your companies against a list of comparable companies (“comps”)
  - Your list of comparable companies is to be approved by me.
  - Choose at least two multiple approaches you believe to be the most appropriate

- **Step 7**: Final Value Estimation (Tuesday 14 April)
  - Reconcile the values from Steps 4 through 6
  - Determine a range of values

- **Step 8**: Recommendation
  - Specify a range of target values for each stock
  - Make a specific Buy, Sell or Hold recommendation for your stocks.
COURSE OUTLINE

I. Introduction to Valuation (Damodaran, Ch. 1, pp. 1-18, 20-24)
   a. Valuation, as you now know it – a review of the time value of money
   b. Misconceptions about valuation
   c. Science vs. Art
   d. Approaches to Valuation
      i. Discounted cash flow valuation
      ii. Relative valuation

II. The Equity Valuation Process (Reading, Stowe Ch. 1 (on Canvas))
   a. Valuation concepts and models
      i. the valuation process
      ii. understanding the business
      iii. forecasting company performance
      iv. selecting the right model
   b. Communicating valuation results
      i. Contents of a research report
      ii. Format of a research report

III. Estimating Discount Rates (Damodaran, Ch. 2, pp. 25-40, 48-59, 62-74, 77)
   a. Cost of Equity
      i. Risk and Return Models
      ii. Parameter estimation
      iii. Equity risk premium
   b. From the Cost of Equity to the Cost of Capital

IV. Evaluating Financial Performance (Higgins, Ch. 1 and Ch. 2, on Canvas)
   a. Financial Statements
   b. Sources and Used of Funds
   c. Ratio Analysis

V. Measuring Cash Flows (Damodaran, Ch. 3, pp. 79-116)
   a. The importance of earnings
   b. Free Cash Flow to the Firm
   c. Free Cash Flow to Equity

VI. Forecasting Cash Flows (Damodaran, Ch. 4, pp. 117-145)
   a. Pro Forma financial statements
   b. Measuring growth
   c. Estimation approaches
VII. Equity DCF Models (Damodaran, Ch. 5, 157-170)
   a. Dividend Discount Model
      i. Constant growth model
      ii. Two-stage growth model
      iii. Three-stage growth model
   b. Free Cash Flow to Equity Discount Models
      i. Inputs
      ii. Strengths and limitations
   c. Dividend Discount Modes v. FCFE Discount Model

VIII. Firm Valuation Models (Damodaran, Ch. 6, 193-211, 222-227)
   a. Cost of capital approach
   b. The effects of capital structure on value
   c. Advantages and disadvantages

IX. Relative Valuation
   a. First principles (Damodaran, Ch. 7, pp. 231-250)
   b. Equity Multiples (Damodaran, Ch. 8, pp. 255-277)
      i. P/E Ratio
      ii. PEG Ratio
      iii. P/BV Ratio
      iv. P/Sales Ratio
      v. Determinants of equity multiples
   c. Value Multiples (Damodaran, Ch. 9, pp. 295-324)
      i. Scaling variable
      ii. Value/Book Capital
      iii. Enterprise value/Revenues
      iv. Enterprise value/EBITDA
      v. Application

X. Introduction to Valuation – reprise (Damodaran, Ch. 1, pp. 1-18, 20-24)

XI. Measuring Portfolio Performance (Bodie, Kane, & Marcus, Ch. 24, on Canvas)
