History

Xavier University was founded in 1831 as a literary institute by the great Apostle of the West, Edward Dominic Fenwick, of the Order of Preachers, who was the first Bishop of the Diocese of Cincinnati. He called his school The Athenaeum and built the buildings on Sycamore Street in downtown Cincinnati where St. Xavier Church and St. Xavier High School now stand.

In 1840, his successor, Bishop John Baptist Purcell, invited the Jesuits from St. Louis University to take over the administration of the school. They arrived on October 1, 1840, and began first classes shortly after. The Jesuits changed the name to St. Xavier College. For the past 107 years the Jesuits have had continuous operation of Xavier. In 1919 the college moved to the present site on Victory Parkway in Evanston-Avondale. In 1930 the name was again changed, this time to Xavier University.

COLLEGE OF LIBERAL ARTS

The College of Liberal Arts is the heart of the Jesuit system of education. The college holds this place because it is the unit of a university wherein the distinctive purposes of Jesuit education are more fully realized. The first two years of the Liberal Arts College are devoted almost wholly to general education; the last two years are devoted in great measure to advanced and specialized study in fields of knowledge upon which the student wishes to concentrate. During these last two years, however, each student must devote almost one-third of his work to the study of philosophy and Christian culture which thus climax and integrate his general education.

Evening College

The purpose of the Evening College is to aid adults of Greater Cincinnati in obtaining a more advanced education by means of courses of cultural and practical value. This division renders particular service to those who wish to carry college work toward a degree while working during the day; and to those who wish to pursue subjects which will better fit them for special services or vocations.

In addition to the liberal arts courses, technical and vocational courses are offered. All courses are open to men and women. Besides the individual course offerings, there are groupings and programs of courses leading to certificates, diplomas, and degrees.

The Evening College is administered by an associate dean, and all classes are conducted on the downtown campus, 520 Sycamore Street. Information regarding the Evening College will be found in Xavier University Bulletin No. 3.

Milford College

A division of the College of Liberal Arts is located at Milford, Ohio, about fifteen miles east of Cincinnati. It is the humanistic training school for those new members of the Jesuit Order who are assigned to the Chicago Province. The courses are open to Jesuits...
only. This College is administered by an associate dean. The names, title, and rank of the faculty are contained in this catalogue.

Ultimate Objective

The College of Liberal Arts has the same primary purpose as the Catholic educational system taken in its entirety. This is best expressed in the words of Pope Pius XI:

The proper and immediate end of Christian education is to cooperate with divine grace in forming the true and perfect Christian, that is to form Christ Himself in those regenerated by Baptism. . . . The true Christian, product of Christian education, is the supernatural man who thinks, judges and acts constantly in accordance with right reason illumined by the supernatural light of the example and teaching of Christ; in other words, to use the current term, the true and finished man of character.

Immediate Objectives

The College of Liberal Arts, in its teaching, aims at reaching the whole man, his intellect, his will, his emotions, his senses, his imagination, his aesthetic sensibilities, his memory, and his powers of expression. The educational program at Xavier University, therefore, takes into consideration three types of training — the intellectual, the moral and religious, and the physical.

The intellectual training at Xavier University is guided by principles set forth in the Ratio Studiorum, a body of principles and suggestions outlined and revised over the space of nearly three hundred and fifty years by the most prominent Jesuit educators. The Ratio postulates that studies, falling into certain groups, have distinct educational values, so that the specific training given by one group cannot be supplied by another. Mathematics, the natural sciences, languages, and history are complementary instruments of intellectual development and are considered basic for a general education. Mathematics and the natural sciences bring the student into contact with the material aspects of nature, and exercise the deductive and inductive powers of reason. Language, history, and the social sciences effect a higher union. By their study and for their requirement the whole mind of man is brought into the widest and the subtlest play. With the introduction of the student to these subjects the emphasis on general education is lessened. The student may then go on to advanced and specialized studies in any field for which his preparation and qualifications indicate a special aptitude. The purpose of the advanced and specialized studies is not proximately to fit the student for some specialized employment or profession, but to give him such an intensive, vigorous, and rounded development as will enable him to cope successfully even with the unforeseen emergencies of life, as well as to prepare him for higher intellectual research which the complexity of modern life lays open to him. Accordingly, almost one-third of even his upper division work continues to be of the nature of general education which consists of philosophy and Christian culture.

As a background for his higher studies the Ratio stresses mental and moral philosophy, not only for the influence such a study has in mental development, but for the power of discrimination which it gives the student. The emphasis is not upon a history of the philosophies, but upon a study of Neo-Scholastic Philosophy wherein is to be found a logical, unified, complete system of mind-culture in accord with the laws of human thought.

The Ratio establishes as a fundamental principle that knowledge, though it energizes and refines the intellectual powers, does not of itself perfect the moral powers; that religion alone completely and perfectly purifies the heart and strengthens the will; that to be effective, religion must be taught so as to become a continuously vital force in education and the core-subject and integrating basis of all knowledge. In its moral and religious training Xavier University aims at building the conscience of its students for the right fulfillment of their civil, social, and religious duties. To gain this objective Xavier University provides: (a) required courses in religion for all Catholic students, and courses in morality and character development for non-Catholic students; (b) an annual retreat, held between the interval of the first and second semesters during which time the Spiritual Exercises of St. Ignatius are given.

Ample provision is made for the health and physical training of the student through health examinations, well-planned inter-collegiate and intra-mural athletic programs, the R.O.T.C., and a physical education program for all students.

University Services to Students

Religious Welfare

Xavier University uses various means of promoting a sincere Catholic way of living in its students. Too numerous for catalogue listing, they permeate classroom and general campus atmosphere. From the elaborate celebration of Field Mass to a quiet visit in Bellarmine Chapel, student life is vibrant with that simple devotion characteristic of Christian principles.

Student Retreat

Each year during the interval between the first and second semesters the Spiritual Exercises of Saint Ignatius Loyola are given for all Catholic students. Attendance at the exercises is obligatory.

At the same time a series of conferences on morality, character formation and the natural virtues are given to the non-Catholic students. In none of these conferences is there anything said to disturb the religious convictions of any individual exercitant. Attendance at these conferences is obligatory.

Student Health Service

The Student Health Service is the organization through which the University fulfills its obligation to its students for the care of their physical and mental health and at the same time assures itself and the families of these students that a reasonable supervision is being exercised by the institution for the maintenance of physical and mental fitness of the student.

Participation in the Student Health Service through the payment of the Student Health Service fee is obligatory.

The functions of the Student Health Service are:

1. To counsel students on all problems of health
2. To teach and encourage habits of healthful living
3. To give hygienic advice for the improvement of impaired health, and to supervise the sanitary condition of all campus facilities
4. To provide medical attention on the campus for sickness and accidents
5. To supervise hospitalization of ill students

Health examinations are required of all new students as part of their entrance requirements to Xavier University. Forms for this
examination are to be filled out by the family physician and must be in the hands of the medical director of the University before the beginning of the semester in which the applicant enters the University.

Counselling Service

The University strives to give each student as much individual attention as is possible. All students entering the College of Liberal Arts are required to consult with a member of the Committee on Student Advisement prior to registration for the purpose of selecting a suitable program of studies.

At the time of registration the student is assigned to an adviser whom he is obliged to see at least once each semester for consultation in matters pertaining to his scholastic work.

Freshmen are interviewed once each session by the Dean of Freshmen.

For spiritual and more personal guidance the University provides a student counselor who sees all students according to schedule or by appointment. Consult the Student Counselor, Hinkle Hall.

All matters of veterans' welfare are under the direction of the Director of Veterans' Education.

Student Housing

Elet Hall and the Marion Residence, under the supervision of the Jesuit Fathers, are equipped to accommodate one hundred-sixty students in single and double rooms. The University has special housing units on the Evanston campus for two hundred-fifty veterans.

Cafeteria Service

The University Cafeteria serves three meals daily (Sunday included) under the supervision of a dietitian.

The Canteen

Canteen service is provided in South Hall.

The Book Store

The University maintains a completely equipped book store in South Hall.

Libraries

The University Library, housed in the Walter Seton Schmidt Library Building on the Evanston Campus, contains many interesting and valuable collections among which are the original manuscripts of Francis J. Finn, S.J.; a fourteenth century vellum manuscript of the sermons of St. John Chrysostom; a fifteenth century antiphonary; several incunabula; letters of Andrew Jackson, Martin Van Buren, and others; and a complete set of the Jesuit Relations. The total number of bound volumes is 49,515. The University has been a constant beneficiary of many friends whose contributions have aided considerably in increasing the number of volumes. Since 1925 the organization known as the Booklovers of Xavier University has been outstanding in its generous gifts and contributions.

With the exception of Sundays and holidays, the library is open to the faculty and the students from 8:30 a.m. to 5:00 p.m.

The St. Thomas Library, a branch of the University Library, is situated in Milford and is for the service of the faculty and students of the Milford College of Xavier University. In keeping with the humanistic curriculum of this division a great part of the 42,245 volumes is in the field of English and classical literature. Very noteworthy collections of ascetical and theological works are distributed in the buildings at Milford.

The total bound volumes of the University libraries is 91,760.

Laboratories

The biology laboratories, located in Albers Hall, are standard for undergraduate students. There are facilities to accommodate one hundred and twenty-five students at one time. A large collection of museum specimens provides opportunity for a wide knowledge of living organisms. An animal room affords the advanced students an opportunity to conduct protracted experiments. Fine records of experimental investigations are made possible by complete photographic equipment.

Two large, well-equipped laboratories for general physics, and one for advanced work in optics, occupy more than twenty-five hundred square feet of space on the second floor of Albers Hall.

The seismology laboratory, used for research in seismology, is connected with the physics laboratories. For the purpose of advancing the science of seismology, Xavier University maintains a first class seismographic station and observatory in the network of the Jesuit Seismological Association. The vault containing the instruments is situated in the basement of the library building. On massive concrete pillars, structurally independent of the building itself, are four Wood-Anderson torsion seismographs which register the horizontal components of the earth's motion. A fifth instrument, a Galitzin-Wilip electromagnetic seismograph, galvanometrically registers the vertical motion of the earth. A special master-clock, corrected by the Arlington radio time signals, gives accurate time control on the seismograms.
The chemistry laboratories, housed in Science Hall and North Hall, occupy approximately twenty thousand square feet of floor space. There are separate laboratories for physical, organic, analytical, general inorganic and graduate work in chemistry. These laboratories have standard equipment sufficient to serve 700 students.

The Department of Military Science is adequately equipped with apparatus for laboratory and field work. It has small arms and equipment — pistols, machine pistols, carbines, M-1 rifles, automatic rifles and launchers — necessary for elementary training in basic military courses. It also has one battery of the celebrated 105mm howitzers equipped for high speed traction. Transport facilities for this battery consist of motor vehicles classified as prime movers, detail cars, supply trucks, and wire trucks. Additional equipment includes the required complement of the most modern radio sets, motor reels, switchboards, field telephones and fire control equipage. Two pistol ranges, an indoor rifle range, a motor room with motor parts for demonstration purposes, maps and aerial photographs, and various other equipment make material contribution to a thorough knowledge of the science of field artillery.

Scholarships

At Xavier University a scholarship for one year is provided by the donation of $306.00. This amount will keep one student, who is a candidate for a bachelor's degree, free from tuition for one year. A permanent scholarship is provided by the gift of $10,000. The amount of the scholarship, however, will always depend on the income from the investment. If the founder fails to name an incumbent, the scholarship will be conferred at the discretion of the committee on scholarships.

In addition to any other requirements peculiar to particular scholarships, the following conditions must govern the awarding or holding of any scholarship:

a. A scholarship applied to tuition only and does not excuse the designee or holder from payment of other fees.

b. Scholarships must be accepted for the year or years they are awarded. They may not be transferred by the holder and may not be resumed at will after having been relinquished.

Honor Scholarships

A limited number of honor scholarships are awarded to high-school graduates each year. The following regulations govern the awarding of all scholarships:

1. Application must be made by the high-school principal before the student concerned graduates.

3. The student must have ranked in the upper ten per cent of his class and must have had a general average of 85 per cent (B) or better during the last two years of high-school attendance.

4. The scholarship will be awarded for one year and will be renewable in favor of the holder for each successive semester of his four-year college period.

5. Holders of honor scholarships must maintain a quality-point ratio of at least 2.5 in the freshman year, and 3.0 in the sophomore, junior, and senior years.

6. The award in all cases is made by and at the discretion of the Scholarship Committee of Xavier University.

With the exception of activities and organizations of a purely religious nature only such students as are free from disciplinary censure and the scholastic censure of probation are eligible for active membership. The University reserves the right to discontinue, or moderate any student activity or organization. By means of its committees and agencies the University also has the right to limit the extent and degree of the individual student's participation. Graduate Division

Because of the fact that men and women are today seeking higher education in ever growing numbers, Xavier University deemed it proper to inaugurate graduate studies during the summer session of 1946. Throughout the academic year as well as the summer sessions, graduate courses are offered in chemistry, classical languages, education, English, history, mathematics and philosophy. The Graduate Division is open to men and women.

The Graduate Council encourages the registration of both special students and degree students. Special students are those students who, with the approval of the head of the department concerned, register for individual courses which they may pursue with profit, without regard to degree requirements. Degree students are those students who register with the expressed intention of following a program leading to a graduate degree.

THE DEGREES OF MASTER OF ARTS AND MASTER OF SCIENCES

Objectives

Because of the difference in subject matter the objectives of the Master of Arts and Master of Science degrees are not identical. In the Master of Arts program greater emphasis is laid upon cultural and liberal pursuits. Thus in mathematics either a Master of Arts or a Master of Science degree may be obtained depending on the student’s interest in pure or applied mathematics. Yet, since Xavier's undergraduate program — the norm of admission for graduate students — calls for a broad background of general education, philosophy, and Christian culture even for the Bachelor of Science degree, the final goal of the two graduate degrees is approximately the same. It is this: that the student may have a specialized knowledge of his chosen field, coupled with an intelligent appreciation of the place of that field in the wide panorama of human thought.

Accordingly, these degrees are awarded to the candidate who has demonstrated a capacity for further study or teaching by satisfactorily completing a program of graduate work designed to give him these characteristics:

1. An understanding of the relations of his subject to allied subjects and to the synthesis of Christian culture, which is the basis of Western civilization;
2. A comprehensive knowledge of the broad field of learning in which the degree is conferred;
3. A specialized knowledge of a portion of that field;
4. Proven ability to do research in the special field of study.

General Requirements

In accordance with the above objectives the general requirements for the degrees are respectively:

1. Completion of such undergraduate prerequisites as will give assurance of the candidate’s general educational background. Satisfactory completion of the Graduate Record Advanced Test;
2. Completion of a program consisting of at least twenty-four hours of integrated classroom study within the student’s chosen field;
3. Production of an acceptable thesis of a research character. To safeguard the cultural objectives it should be kept in mind that the result of research can be synthesis as well as analysis. For the thesis six credit hours (completing the required thirty hours) will be awarded on the recommendation of the thesis adviser.

THE DEGREE OF MASTER OF EDUCATION

Objectives

The degree of Master of Education, a professional degree, is designed to meet the needs of teachers and school administrators actually engaged in school work. It has one basic aim: stimulating better teaching wherever the influence of the successful candidate may extend, whether it be in an individual classroom, an entire school, or a whole school system.

Accordingly, this degree is awarded to the candidate who has demonstrated a capacity for improving the quality of teaching within the particular sphere of his influence by satisfactorily completing a program of graduate work designed to give him these characteristics:

1. Broadened appreciation of the proper objectives of education in modern society;
2. Deepened understanding of the psychological factors in learning;
3. Wide acquaintance with effective classroom techniques;
4. Intimate familiarity with the principles and practices of school administration;
5. Essential understandings and skills necessary for intelligent consumption of educational research;
6. Greater academic mastery of subject matter (for students selecting graduate work in an academic field).

General Requirements

Requirements for the degree of Master of Education are specified with certain basic considerations in mind:

1. Sufficient flexibility is necessary to care adequately for the particular needs of the in-service educator who enrolls for the degree;
2. Before students are accepted as candidates for this degree, they must demonstrate a basic knowledge of the general field of education as generally required of undergraduates planning to teach;
3. Graduate programs must be so planned as to insure the student's attaining a comprehensive knowledge of professional theory and practice in the principal areas of the field; a detailed knowledge of at least one major area of specialization—for high school teachers this area may be an appropriate academic field; and capability in the skills and knowledge necessary for for intelligent comprehension and use of educational research.

Undergraduate Prerequisites

Students electing graduate work leading to the degree of Master of Education must present the following undergraduate courses in education or their equivalent:

- Principles of Education;
- Educational Administration, Organization, and Management;
- Educational Psychology (prerequisite, general psychology);
- Methods of Teaching.

Program of Studies

To insure comprehensiveness in their programs for the degree of Master of Education, all candidates must include in their programs each of four general survey courses designed, in their whole, to provide integrated coverage of the broad field of education. These courses are:

- Ed. 201. Philosophy of Education, a Survey;
- Ed. 203. Educational Psychology, a Survey;
- Ed. 205. Educational Administration, a Survey;
- Ed. 207. Education Research from the Consumer Point of View, a Survey.

To insure their mastery of a particular area of education, all candidates must include in their programs a concentration of at least twelve credit hours in one of the following areas of concentration: elementary education, secondary education, educational guidance, educational administration, or an academic field. Thus the area of concentration may also be in any of the academic departments in which graduate courses are offered.

Students electing graduate courses which they plan to submit in fulfillment of requirements for the degree of Master of Education, must have their programs approved by the Chairman of the Department of Education in advance of their registration for courses if they are to be assured of the appropriateness of their selection.

Quantitative Requirements

A minimum of thirty hours is required for the degree of Master of Education. These shall be distributed as follows:

1. General surveys in education, twelve credit hours.
2. Concentration, twelve credit hours.
3. Pertinent electives, six credit hours.

Qualitative Requirements

The degree of Master of Education will be awarded only to candidates who have passed an oral examination lasting one hour on the general field of education as covered by the four survey courses and the individual's area of concentration.

GENERAL REGULATIONS

Admission

Application for admission to graduate studies is made in form. Application forms can be had on request. Applications should be followed promptly by a transcript of applicant's credits.

Students electing graduate work leading to a master's degree must present evidence of having a bachelor's degree from an accredited institution, and also present official transcripts of his record from each college in which credit was obtained. Others will be registered conditionally.

An applicant with a bachelor's degree from a non-accredited institution is not admitted to full graduate standing until he has successfully completed at least six hours of graduate work with the
required grades, and has been accepted by a committee of the Graduate Council on recommendation of the student's adviser.

Since graduate work is work done under direction, the chairman of the department of the student's major subject must decide on the student's preparation for graduate study in that department; and he, or one appointed by him, will be the student's adviser throughout. The general prerequisites for graduate work in any department must be the equivalent of an undergraduate major at Xavier University.

Seniors of satisfactory academic standing who are within nine hours of completing their undergraduate requirements for the bachelor's degree may, in their last semester, register for graduate work, but not for more than six hours of such work.

Candidacy

Candidacy shall begin when, after the student's completion of six hours of graduate work, his application shall have been passed by the graduate council. Every student must make such application after completing six hours of work at Xavier and those thought unfit will be advised to discontinue their course.

No more than five years may elapse between candidacy and completion of work for the degree.

A student who attends only summer sessions may be granted a graduate degree provided he is engaged in work related to his major subject. This supposes that no more than five years shall elapse between his candidacy and the completion of his work.

Requirements

Thirty semester hours of graduate work will be demanded of an applicant for any of the above degrees. In the case of applicants for a Master of Arts or Master of Science degree, twenty-four hours of such work will be devoted to fulfilling the course requirements and six hours to fulfilling the thesis requirement. Applicants for the Master of Education degree will devote the thirty hours to course requirements.

Students will be allowed to transfer no more than six graduate credits from other institutions.

For degrees requiring a thesis, familiarity with at least one foreign language is required for cultural background and use in research.

Distribution of the course requirements must be approved by the chairman of the department of the major subject. At least one-half of the courses taken must be fulfilled in that department. Candidates, however, for the Master of Arts and Master of Science degrees are advised to take all their work in their major department.

Character of the courses required is subject to the decision of the adviser. At least one-half the hours of credit in the major subject and one-half the total number of hours toward the degree must be obtained in courses numbered 200 or above, which are distinctly graduate courses.

Examinations and Marking

The candidates for graduate degrees shall be required to pass an oral examination. It shall be the policy of the Graduate Division to give these examinations within three weeks of the end of the final semester. The head of the major department or one appointed by him shall be chairman of the examining committee and shall be responsible for the giving of the examination. The student must pass such other oral or written examinations as are required by his major department.

The matter for the oral examination shall be based primarily on the student's courses and, if he is a candidate for the Master of Arts or Master of Science degree, on his thesis. It is understood, however, that a candidate's general knowledge of his field must be found satisfactory by his examiners.

The thesis required for the Master of Arts or Master of Science degree should embody the results of the applicant's research in some problem of his major subject, and must at each stage be under the direction of the Chairman of the Department of that subject or of one appointed by him.

The student must submit three typed copies of his thesis after it has been formally approved.

The following symbols are used in the evaluation of course work:
A — indicative not only of high achievement, but also of an unusual degree of intellectual ability and initiative; B — above average attainment; C — work of minimum or average attainment; D — work of inferior quality, but passing; F — failure. To pass graduate students must do work of B quality in courses numbered 100 to 199, and of C quality in courses numbered 200 or higher.

Graduate Record Examination

All applicants for admission to the Graduate Division will be required to take the Graduate Record Examination at Xavier University, or to bring with them an official report of their scores. This report must include results of the general profile tests and results of the advanced tests in the student's proposed field of specialization if one is available in that field. Scores made on this examination permit the student to know accurately his strength or weakness in
the various fields of knowledge in relation to national norms for comparable students. In addition, the scores will aid the faculty in the guidance of the student.

**ADMISSION**

**Application for Admission**

Application for admission to Xavier University is made on a special form (Form 1) which will be supplied upon request made in person or by mail to: The Registrar, Xavier University, Victory Parkway, Cincinnati 7, Ohio.

**Procedure of Admission**

Application is made in form (use Form 1).

To become eligible for admission to Xavier University, an applicant must follow this general procedure:

1. He must obtain from the registrar a copy of the form of application (Form 1) for admission.

2. He should fill out this form and send or bring it to: The Registrar, Xavier University, Victory Parkway, Cincinnati 7, Ohio. Applicants who have been registered previously on the Evanston campus are required to submit only the application form with the admission (reservation) fee of $25.00 to the registrar. Veterans please see paragraph on Admission of Veterans.

3. He should arrange to have a complete transcript of his high-school record sent to the registrar. If he seeks admission to advanced standing, he must also have a complete transcript of all previous college work sent to the registrar. Please note paragraph on Necessary Credentials.

4. Immediately upon notification of acceptance, the applicant must send his admission (reservation) fee of $25.00 to: The Registrar, Xavier University, Victory Parkway, Cincinnati 7, Ohio.

5. If the applicant is accepted by the University, he should register in person on the days designated on the notice of admission.

**Time of Admission**

Students may enter the University for the first semester, second semester, or summer session.
Admission Fee

Upon notification of acceptance, new students must promptly pay the admission or reservation fee of $25.00. Former students will remit this fee with their applications. The fee is not refundable or transferable if the student cancels his application, fails to enter the University, or does not remain in residence or attendance for at least four weeks after his registration. It will be applied to the student's account at registration, or refunded to the veteran after he has deposited his certificate of eligibility with the University's director of veteran's affairs.

Admission by Certificate

Graduates of accredited high schools are admitted by certificate of graduation and an official record of units of high-school credit together with an official recommendation from the high-school principal.

A unit is the equivalent of a subject extending through a school year of thirty-six weeks with five recitations per week. A minimum of fifteen units is required.

The fifteen required units may be offered in the following distributions:

1. A group of units including three units in English; two in foreign language; one in history; one in algebra; one in plane geometry, and one in science.
2. A group including two major sequences of three units each, and two minor sequences of two units each selected from:
   a. English and speech. A major sequence must be offered from this group.
   b. Foreign language. Any sequence must be in one single language selected from Greek, Latin, French, German, Italian, Polish or Spanish. Not more than two sequences in foreign language are acceptable.
   c. Mathematics. A minor sequence including one unit in algebra and one unit in plane geometry is required. All applicants, except those following the pre-engineering program, may offer a unit of physics combined with a minor sequence in mathematics as a major sequence. Applicants for the pre-engineering program must present a major sequence in mathematics, including one and one-half units in algebra, one unit in plane geometry, and one-half unit in solid geometry.
   d. Science. Not more than one unit in any one science may be offered. Physics may not be counted toward a science sequence if it is counted toward a major sequence in mathematics. If biology is included, neither botany nor zoology may be counted.
   e. Social studies. This sequence may include from one to four units in history; from one-half to one unit in American government; one-half unit in economics; one-half unit in commercial law; one-half unit in geography; and from one-half to one unit in sociology.

The remaining units may be in any subjects counted toward graduation by an accredited high-school. However, single half units in languages or laboratory sciences will not be acceptable.

Applicants who have a deficiency not to exceed two units will be admitted as deficient. Such deficiency must be removed before admission to sophomore standing.

Candidates who do not meet the qualifications outlined above may, under special circumstances, be admitted at the discretion of the committee on admissions.

Admission on Probation

Graduates of non-accredited high schools will be admitted on probation if they satisfy admission requirements in every other way and provided that the quality of their high-school work is sufficient to rank them in the upper two-thirds of their class. This probation will continue for at least one semester.

Applicants who are high-school graduates, but whose principals are unwilling to recommend them for college on the basis of a part or the whole of their high-school record, may be admitted on probation at the discretion of the Committee on Admissions. Applicants, however, must pass successfully whatever examinations the committee shall deem necessary.

Applicants who are not high-school graduates, but who are at least twenty-one years of age, may be admitted by examination.

Such examinations as will enable the committee to determine the equivalence of high-school graduation and qualifications for college will be required.

All applicants admitted by examination are on probation for a period of at least one semester.

Admission to Advanced Standing

Applicants from other institutions of collegiate rank must file with the registrar complete original credentials from all institutions attended. These credentials must include an official transcript of all high-school and college credits showing the entire scholastic record;
evidence of honorable dismissal or dismissals; and evidence of satisfactory completion of financial arrangements with the institution or institutions attended. No applicant may disregard his previous college record and apply for freshman standing.

The rank of advanced standing to which the student will be admitted will depend upon the quantity and quality of the work done in the other institution or institutions, the accreditation of the institution, and the conformity of the work to the degree program for which the student wishes to register. Courses in which the applicant has received the lowest passing grade will not be acceptable. These courses need not be repeated unless repetition be deemed necessary by the dean or the directors of the departments. In all cases evaluation of credits for advanced standing will be provisional for at least one semester.

Students dismissed for poor scholarship from the University or from other institutions will not be eligible for admission or readmission until after the lapse of at least one semester. In all cases, admission or readmission and the conditions of such, will be determined finally by the committee on admissions.

Students admitted to advanced standing are bound by the degree requirements in force at the time of application for academic classification. The residential requirements for a degree must be fulfilled by all students admitted to advanced standing.

All credentials must be on file in the registrar's office at least one month prior to the day of registration. (See paragraph on Credentials Needed.) It is advisable to get transcripts in much earlier.

Credentials Needed

Applicants for admission to Xavier University must submit official records from all high schools and colleges previously attended. These records must be sent to the registrar directly by the proper officer of the school or schools formerly attended; never through the student. Credentials accepted for admission become the property of the University and are kept on file permanently. All credentials must be filed at least one month before the day of registration.

Admission of Veterans

Xavier University is accredited with the Veterans Administration for educational training under Public Law 346 and Public Law 16.

All veterans who were students in good standing in Xavier University before entering the service will be readmitted if they give notice of their intention to re-enter in due time before registration.

Other veterans new to Xavier University will follow the procedure for new students. (See paragraph on Procedure of Admission.)

Veterans who wish to enter college or return to interrupted college work should, as soon as possible after discharge, apply to the Veterans Administration for a certificate of eligibility which is the official form designating the amount of schooling to which a veteran is entitled under the G.I. Bill of Rights. The Veterans Administration office for the Cincinnati area is located in the Fuller Building, Eighth and Walnut Streets, Cincinnati, Ohio. Application may be made by presenting discharge papers at this office.

All veterans will be allowed academic credit for military service depending on the length and kind of service. Credit for formal service courses and schools is based on the recommendations set forth in A Guide to the Evaluation of Educational Experiences Gained in the Armed Services, published by the American Council on Education, and on the recommendations of the Jesuit Educational Association.

Credit will also be granted for courses completed in the A.S.T.P., Navy V-12, or Army Air Forces College Training Program upon receipt of a transcript from the college where the program was taken provided such courses are applicable to the curriculum to be followed and do not duplicate courses already credited.

Veterans must deposit the certificate of eligibility with Xavier University's director of veterans' affairs at the time of registration. The certificate is not given to the dean, registrar or bursar. Refunds of admission or reservation fees are made after registration.

Any honorably discharged veteran who has had active service is entitled to one year of education and an additional period of training not to exceed the time such person was in active service after September 16, 1940, and before the termination of the war, but in no case is the total period of education to exceed four years.

The Veterans Administration will defray the cost of tuition, books, supplies, and laboratory, library and other incidental fees up to a total of $500.00 for the ordinary school year in any approved private or public educational institution which the veteran chooses to attend.

The Veterans Administration will also pay to veterans in actual attendance of school under the G.I. Bill of Rights the following subsistence allowances:

1. $75.00 per month to veterans without dependents
2. $105.00 per month to veterans with one dependent
3. $120.00 per month to veterans with two or more dependents

Servicemen who are honorably discharged and who have pensionable service-incurred or service-aggravated physical disability and who have established their need for vocational education may find it to their advantage to apply for increased benefits under Public Law 16.
Veterans who wish to register in the University without the VA Form 7-1950, will be considered as non-veterans and will be required to settle their accounts in full at the time of registration.

All requests for information should be addressed to: The Director, Veterans' Education, Xavier University, Victory Parkway, Cincinnati 7, Ohio.

A limited number of honor scholarships will be given by Xavier University. Application for an honor scholarship should be made to: The Chairman, Scholarship Committee, Xavier University, Victory Parkway, Cincinnati 7, Ohio.

Readmission

Readmitted students who have been absent for more than a year are subject to the degree and curricular requirements in force at the time of their readmission. If a student has attended another school since his withdrawal from Xavier University, a record of that work must be submitted before readmission.

Veterans who apply for readmission, however, may qualify for degrees under requirements in force at the time of their departure from Xavier University for military service, depending upon their classification at the time of their entrance into service.

Admission of Special Students and Auditors

Although the University usually recommends a complete program of studies, students who possess sufficient maturity, experience, and educational background may, with the dean's consent, choose special courses without following a complete degree program. Courses thus taken may be subsequently credited toward a degree if proper credentials are presented.

Students may enroll themselves as auditors upon payment of the usual fees and tuition. Academic credit is never given to an auditor.

Notification of Admission

The applicant will receive from Xavier University a notice of admission or a notice of unfavorable action as soon as the University has received his admission form and the official records from all high schools and all colleges previously attended.

Provisional Admission

Provisional admission may be granted by the dean to a student who has been unable to complete arrangements for formal admission before registration dates. If the student is later discovered to be unqualified for admission, his admission and registration are canceled.

Transfer within the University

A student who wishes to transfer from Xavier University, Evanston Campus, to the Evening College, 520 Sycamore Street, must present to the Dean of the College of Liberal Arts, Evanston Campus, a written petition stating his reasons for seeking the transfer. If the dean approves the transfer, he will sign the student's petition. The student will then present the approved petition to the Dean of the Evening College who will advise the student of further arrangements necessary.

Transfers should be arranged at least one month before the opening of a session.

Withdrawal from the University

A student who wishes to withdraw from the University must notify the office of the dean either in person or in writing. A student is considered to be in attendance until he has given this formal notice of withdrawal.

A student will be obliged to withdraw for reasons of poor scholarship, failure to remove academic probation, or misconduct.

Honorable Dismissal

Honorable dismissal is voluntary withdrawal from the University with the consent of the dean. A statement to such effect, indicative of the student's good standing as far as character and conduct are concerned, will be issued only when all indebtedness to the University has been adjusted.
Registration

Registration is the procedure which a student follows in enrolling for courses and in receiving assignment to definite classes, professors, hours and classrooms.

Both new and former students of all categories must complete the process of registration before every new session in which the student attends classes.

Students must register in person, not by proxy or by mail.

Time of Registration

Fixed dates in each session found in the academic calendar of this catalogue are reserved for registration.

Late Registration

Registration on days later than the assigned dates may be permitted upon the payment of a late registration fee of one dollar ($1.00) per day up to ten ($10.00).

Change in Schedule

After the student has filed registration forms, changes in courses or sections can be made only with the consent of the dean at the recommendation of the departmental adviser. No change in schedule may be made later than two weeks after the inception of classes.

A fee of one dollar ($1.00) will be charged for each change unless the change be recommended by the dean or by the departmental adviser.

Number and Choice of Courses Permitted

The number and choice of courses or total number of credit hours in a student's program of studies are subject to such restrictions as shall be deemed necessary by the dean or the departmental adviser.

Course Duplication

A student who enrolls for a course which he has already passed at Xavier or at any other institution will not receive credit for that course.

Selection of Courses

Classified students must take the required courses at the proper class level; thus, all freshman courses should be completed before the sophomore courses. (See Outline of Approved Curricula.)

Both classified and unclassified students must observe prerequisites set by the University or by the departments which conduct the instruction. Students may not disregard the directions of the dean and of the chairman of departments in this matter.

Since the University must consider the needs of all students, it may sometimes be unable to accommodate itself to the preferences of some students for particular hours and professors. The scheduling of courses and sections at certain hours does not mean that a student can always be admitted to any given section which he may select.

Freshman Week

Recognizing the need of giving newly entering students an introduction to their work and University life, an orientation program is arranged and designated as Freshman Week. The program provides for conferences with members of the Committee on Student Advisement; aptitude and placement tests; registration and payment of fees; lectures on the use of the library; the existence and nature of student activities; health and military provisions; and the traditions of the University. All freshmen must register at 9:00 a.m. on Monday of Freshman Week. Freshmen who fail to register at the prescribed time will be charged a late registration fee and also such special fees as are incurred by those who fail to take all prescribed tests and examinations at the designated time.

Transcript Regulations

Application for a transcript of credits must be made in writing by the student himself and filed with the registrar at least two weeks before the record is needed.

Requests for transcripts for purposes of transfer to another university or for any other purpose cannot be granted during the busy periods of examination and registration.

Transcripts are issued only after the student has fulfilled all financial obligations to the University.

There is no charge for the first transcript. A fee of $2.00 is charged for each additional complete transcript.

EXPENSES

The following rates are effective in the regular academic year and in the summer session. All communication concerning expenses should be addressed to: The Registrar, Xavier University, Victory Parkway, Cincinnati 7, Ohio.

An admission or reservation fee of $25.00 will be required of all prospective students whose applications are approved. Receipt of this fee will assure the applicant of a place in one of the University classes.
This fee will be refunded or applied to tuition or room expenses according to the veteran or non-veteran, resident or non-resident status of the applicant.

Accounts Payable (Undergraduate Day Classes)

All accounts must be paid on the day of registration. Attendance at classes will not be permitted until all financial obligations have been completed. Accounts not paid in full within ten days after the first day of class are subject to a service charge of $2.00.

Refunds

A refund of tuition may be claimed in the case of withdrawal or dismissal. During the Academic Year the amount refunded will be diminished by 20 per cent of the total initial amount for each two weeks of attendance. No refund will be made after the student has been in attendance for more than eight weeks.

During summer sessions the amount refunded will be diminished by 20 per cent of the total initial amount for each four class days of attendance. No refund will be made after the student has been in attendance for more than sixteen class days.

Fees are not refunded in summer or regular sessions.

A refund of dormitory expenses may be claimed in the case of withdrawal or dismissal. The amount of refund will be made strictly on the basis of the proportionate number of weeks of residence.

All refunds are made on application in writing to the bursar. The amount of refund will be calculated from the date of application.

Academic Administration

Classification of Students

Students are classified in the following groups: lower division, upper division and other groups of a miscellaneous nature.

Lower Division Groups:
1. Freshmen — students having less than 32 credit hours and 64 quality points.
2. Sophomores — students having from 32 credit hours and 64 quality points to 63 credit hours and 127 quality points.

Upper Division Groups:
1. Juniors — students having from 64 credit hours and 128 quality points to 95 credit hours and 191 quality points inclusive of all lower division requirements.
2. Seniors — students having a minimum of 96 credit hours and 192 quality points inclusive of all lower division requirements.

Other Groups:
1. Part-time — students taking less than 12 credit hours of work in any semester.
2. Unclassified — students who have not declared themselves as candidates for any degree.
3. Auditors — students taking courses for informational purposes and not for college credit.

Unit of Instruction

A unit of instruction is one hour a week for a minimum of 15 weeks. The unit is called a credit hour and is the measure of work in the College of Liberal Arts. A weekly two- or three-hour period of laboratory work is considered equivalent to one credit hour.

Course

A course is a complete set of lectures, quizzes, recitations, student exercises, laboratory periods, and examinations on a given subject. Some courses continue through two successive semesters. No final credit is allowed if only part of such courses is completed.

Field of Specialization

At the close of his sophomore year and with the approval of his adviser and the chairman of the department, the candidate for a degree must select a field of specialization in which he will take more intensive study in his junior and senior years. This field of specialization will consist of a major and a minor.

Major

The major will ordinarily consist of a minimum of eighteen credit hours of upper division work completed with an average of C in one department. This work will suppose the completion of at least six credit hours (C average) of lower division work in the department.

In the departments of classical and modern languages this six-credit-hour requirement of lower division work is not satisfied by beginning courses or their equivalent.

Minor

The minor will ordinarily consist of a minimum of twelve credit hours of upper division work in another department approved by the student's adviser and completed with an average of C. This work will suppose the completion of at least six credit hours (C average) of lower division work in the department.

With the approval of his adviser and the chairman of the department the candidate may distribute his upper division work (approximately thirty credit hours) in the major and the minor on a fifteen-fifteen or twenty-one-nine credit hour basis. Such a distribution of credit hours, however, must be determined before the second semester of the candidate's junior year.

Examinations

Examinations in all courses are regularly held at the close of the session. A student who has been absent from a final examination will receive a grade of “X” if the excuse for the absence is acceptable to the dean; otherwise, the absentee will receive an automatic failure. Absence, however, does not excuse a student from the requirement of a special examination at a time determined by the dean. If an “X” grade is not removed within thirty days a grade of “F” will be given for the course.

Written assignments are due at the time specified by the instructor. If extension is granted beyond the end of a session, the student will be given the temporary grade of “I.” Unless completion of the assignments be made within two weeks after the close of a session, the student will be recorded as having failed the course. “C” is the maximum grade which a student can earn in a course after having received an “I” in that course.

If a student claims knowledge of a subject for which he cannot furnish an official record, a special examination may be given with the approval of the dean and the director of the department.
Grading System and Reports

At the end of each session the parent or guardian receives by mail an estimate of the quality of the student's work in each of the courses pursued. This estimate is based upon the combined results of examinations and class work and is expressed by the following symbols:

A (93-100) — Exceptional  I — Incomplete; grade withheld pending fulfillment
B (85-92) — Above Average  C (77-84) — Average  D (70-76) — Inferior
C (77-84) — Average  (but passing)  X — Absent from examination
D (70-76) — Inferior  W — Withdrawal (approved)
F (below 70) — Failure  WP — Withdrew passing  WF — Withdrew failing

Quality Points

The quality point is the unit used in measuring the quality of student achievement in a course. The number of quality points received for any course is equal to the number of quality points attached to the grade received multiplied by the number of credit hours yielded by the course. Quality points are given as follows:

A — 4 points per credit hour
B — 3 points per credit hour
C — 2 points per credit hour
D — 1 point per credit hour

A candidate for a bachelor's degree must earn not only the number of credit hours (128) required for the bachelor's degree, but his work must possess a certain excellence which is measured by quality points.

The scholastic standing of the student at the end of any session is the ratio of the total number of quality points received to the total number of credit hours carried in that session.

Censures

Any student whose scholastic standing does not attain a quality point ratio of 1.5 for each session of the first year and of 1.75 for each session of succeeding years is automatically placed on scholastic probation. This censure excludes the student from participation in any form of extracurricular activity with the exception of those activities which are of a religious nature, and demands a reduction in the hours which the student may carry. The censure will continue for at least one session. If a student fails to remove this probation or censure within the semester, he will be dismissed from the University.

A student, whose quality point ratio is not so low as to warrant the censure of probation but which does not reach 2.0 (77%), will automatically be placed on the "warned" list. This censure does not demand a reduction of the student's load nor does it positively exclude the student from participation in extracurricular activities, but such participation may be restricted at the discretion of the dean or the departmental adviser.

General failure in a majority of courses or continued low standing (below 77% — 2.0) is regarded as poor scholarship. At the discretion of the dean, such a student will be excluded from registration in the University for at least one session. Permission to return after the lapse of one session, or at any subsequent time, will be granted only at the discretion of the Committee on Admissions.

If a student is placed under scholastic censure, the University assigns the right to change or limit the student's program of courses to the student's departmental adviser or to the dean. The same right will be exercised in the case of poor health or other circumstances unfavorable for study.

The University reserves the right to censure the conduct of any student on or off the campus in accord with the generally accepted norms of good behavior, Catholic practice, and Catholic principles of morality. This censure will be regarded as purely disciplinary and may take the form of correction, suspension, or dismissal which the President of the University, upon advice of the Committee on Student Problems, may deem appropriate. Suspension will carry with it the scholastic loss resulting from absence, and dismissal will mean the loss of credit hours. When a student incurs the disciplinary censure of dismissal, or withdraws while under the censure of suspension, the University has the right to declare, at the discretion of the president, the fact of disciplinary censure to the admissions officer of any educational institution to which the student may subsequently apply. In such cases the reason or reasons of censure will be stated only with the consent of the parent or guardian.

Attendance

In order to secure credit in any course in which he is registered, the student is required to attend classroom and laboratory exercises regularly and promptly. Absences date from the day of opening announced in the calendar.

"Cuts" are not allowed.

A limited number of excused absences may be permitted by the dean if the reasons are adjudged to be sufficiently grave. Excessive absences, even for serious reasons, will disqualify a student for receiving academic credit.
Tardiness

Tardiness at class or leaving class before the expiration of the period will be counted as one-half an absence.

Absence from a Test

Absence from a previously announced test will incur the penalty of a failure in that particular test.

Withdrawal

If a student withdraws from any or all courses without permission of the dean, he receives an automatic failure. Permission will be granted only when application is made within two weeks after discontinuance of attendance.

The student who withdraws from any or all courses with the requisite permission receives a grade of “W”, if the withdrawal takes place within the first third of the session; or a grade of “WP” (withdrawn passing) or “WF” (withdrawn failing), if he withdraws after the first third of the session. The grade “WF” is accounted as a failure in computing scholastic standing.

Curricular Administration

Lower Division and Upper Division Courses

Courses are grouped according to their basic or advanced content. Basic courses, which are ordinarily open to freshmen and sophomore students, are regarded as lower division courses. Upper division courses are open to junior and senior students. Sophomore students, who have completed their lower division requirements in a particular department, may, with the approval of their advisers and the chairman of the department, enroll in an upper division course in that department.

Departments

For the purposes of faculty administration and of classification of courses according to the nature of their subject matter, all courses are grouped in departments. In the College of Liberal Arts there are fifteen departments: Accounting, Biology, Chemistry, Economics and Business, Education, English, History, Classical Languages, Modern Languages, Mathematics, Military Science, Philosophy, Physics, Religion and Sociology.

Curricular Fields

There is a larger grouping of departments into four curricular fields. This grouping is made to facilitate inter-departmental administration and to integrate areas of study.

The four fields are:

1. Language and Literature
   - English and Speech
   - Greek, Latin
   - French, German
   - Spanish

2. Social Sciences
   - Accounting
   - Economics and Business
   - Education
   - Geography
   - History
   - Political Science
   - Sociology

3. Natural Sciences
   - Biology
   - Chemistry
   - Geophysics
   - Mathematics
   - Physics

4. Philosophy and Religion
   - Philosophy
   - Psychology
   - Religion
Lower Division Objectives

Toward realization of the immediate University objectives (intellectual competence with a sense of religious and moral responsibility) and the objectives of the undergraduate division (an exclusively general and liberal training), the student should, at the completion of his work of the first two years, have attained the following:

1. A religious knowledge adequate for personal orientation and influential Christian living
2. An acquaintance with, and some practice in, the modes of thinking — philosophical, mathematical, and scientific
3. A competence in basic English communication, written and oral, with an adequate acquaintance with the types, and some of the masterpieces of English literature
4. A reading knowledge of at least one modern language
5. An acquaintance with the history and principles of social institutions

The objectives and standards of the several departments concerned in this program indicate their special contribution to the above, in such a way that a student who has completed a minimum of sixty-four hours with a C-average, can be regarded as having sufficiently attained the objectives.

Excess quality points at the completion of the student's lower division work may not be applied to remove a quality-point deficiency in the upper division work.

Before the close of his sophomore year, the student who wishes to continue his education in the University will be required to choose a field of specialization for his future work. Only upon acceptance by the chairmen of the departments concerned, and on successful completion of his lower division work, may the student be considered eligible to continue.

In the last semester of his lower division work, a student who has satisfied the lower division prerequisites in a particular subject, may, if his schedule allows, and if the dean and the chairman of the department concerned authorize it, take an upper division course in that subject.

Upper Division Objectives

Toward more special realization of the immediate University objectives (intellectual competence, etc.) and the objectives of the undergraduate division for the last two years of college (continued general and liberal training plus opportunities for specialization), the student is offered the following:

1. A continuation of his general and liberal training in the study of philosophy and allied subjects
2. Fields of specialization, with a major and minors system, for prudent concentration

At the completion of this work, the student must qualify as to his attainment of the University and undergraduate division objectives through a thesis or a comprehensive examination. The matter of these, broadly stated, will be: his knowledge of his field of specialization, his grasp of the principles of knowledge, and his ability in the application, coordination and systematization of facts and principles.

Degrees

The University will confer a bachelor's degree upon any candidate of the University who has successfully completed an accepted program of studies, and who has fulfilled, prior to graduation, all degree requirements, both general and particular. The undergraduate degrees conferred by the University on candidates of the College of Liberal Arts are the degrees of Bachelor of Arts, Bachelor of Philosophy, Bachelor of Science, Bachelor of Science in Business Administration, Bachelor of Science in Physical Education, and Bachelor of Literature.

Graduation Honors

Honors are awarded on the basis of outstanding moral and intellectual attainment. A student who has earned a quality point average of 3.75 in his four years of University work is graduated Summa Cum Laude; one who has earned 3.50, Magna Cum Laude; one who has earned 3.25, Cum Laude. These honors are announced at commencement and are inscribed on the diplomas of those students who merit them. Honors are conferred only when the student has completed at least the last two years in the University. An exception will be made in the case of students transferring from another Jesuit institution.

Residential Requirements

Candidates for degrees must spend at least the last year in residence at Xavier University. Residence is the personal presence at the University of a student carrying a normal weekly load. To establish residence of a year for a bachelor's degree at the University, a student ordinarily must complete one fourth of the total number of hours required for graduation.
Commencement Attendance Requirement

All candidates for degrees must be present at the commencement exercises to receive their degrees.

General Requirements for Graduation

In addition to the requisites of a particular program, a candidate for the bachelor's degree must fulfill the following requirements:

1. The candidate shall have qualified as a classified student in Xavier University and shall have all records from other institutions in order.
2. The candidate shall have completed an accepted academic program of not less than one hundred twenty-eight credit hours with an average of C. Specifically, an average of 2.0 (C) shall have been maintained in his upper division courses since surplus quality points are not transferable from lower division courses.
3. The candidate shall have completed all lower division objectives.
4. The candidate shall have fulfilled the lower division and upper division objectives in the matter of distribution of courses.
5. The candidate, except for the degree of Bachelor of Literature, shall have completed a minimum of eighteen credit hours in philosophy and psychology courses.
6. The candidate, if a Catholic, shall have completed eight credit hours in formal courses in religion, and eight credit hours in Christian culture courses.
7. The candidate, if a non-Catholic, shall have successfully completed R1 3 and 4 (or their equivalent) and eight credit hours of Christian culture courses.
8. The candidate shall have completed, in residence, the last thirty-two credit hours (C average) in courses approved by the College of Liberal Arts.
9. The candidate whose major is in one of the natural sciences or in mathematics, must qualify by a written thesis. The original and one copy, required by the University, must be deposited with the registrar on or before the date designated in the University calendar. All other candidates must qualify by a comprehensive examination.
10. The candidate, with the approval of the head of the department, shall have made formal application to the dean for the degree sought. This form shall have been filed in the registrar's office at the beginning of the last session.
11. The candidate shall have discharged all financial obligations to Xavier University.

N.B. — No student will be considered eligible for graduation who has any deficiency at the beginning of the last session of his senior year, or who has less than one hundred twelve credit hours of C average.

Reservation of Rights

The University reserves the right to modify its graduation and other academic requirements as may seem necessary from time to time. It will be obligated only during the academic year of the student's registration by requirements published in the catalogue for that year.

Subject Requirements for Degrees

In addition to the fulfillment of other requirements, a candidate for a degree in the University must follow a definite program of studies. The prescribed subjects together with the corresponding minimum semester hours for each degree program are listed as follows.

Bachelor of Arts

The degree of Bachelor of Arts is conferred on the candidate whose major has been chosen from any one of the four curricular fields. The prescribed subjects together with the corresponding minimum semester hours required are:

The student must meet the general requirements of the B.S. degree with a major in the combined fields of education and physical education. This major will comprise the basic courses in education, required for qualification for high-school teaching, together with sixteen hours in physical education.

The following courses are required of all candidates for the degree of Bachelor of Science in Physical Education:

Bachelor of Literature

The degree of Bachelor of Literature is conferred on a candidate whose major has been in the curricular field of languages and whose program has included the following subjects and corresponding minimum semester hours:
Preparation for Professional and Technical Schools

In preparation for admission to schools of law, medicine, dentistry and engineering, Xavier University offers the following programs of study.

Pre-Legal Curriculum. Students who apply for admission to schools of law must have completed a minimum of two years (sixty-four semester hours at Xavier University) of collegiate work. Many schools of law now demand a minimum of three years of collegiate training prerequisite to admission. The three-year requirement is met in this program:

Pre-Medical Curriculum. The minimum requirement for admission to standard schools of medicine is two years (sixty-four semester hours at Xavier University) of collegiate preparation. Many schools of medicine now demand a minimum of three years of collegiate preparation prerequisite to admission. The three-year requirement is met in this program:

<table>
<thead>
<tr>

<tr>

</tr>
</tbody>

Pre-Engineering Curriculum. Strictly speaking there is no collegiate preparation demanded by colleges of engineering. However, many of the engineering colleges have basic preparation before the engineering students take up the work of their specialized fields. The Xavier curriculum is designed to cover these usual requirements in
mathematics, drawing, physics, chemistry, and English. It is recommended that the student choose his engineering school and course by the end of the freshman year. Then, during the sophomore year, he can elect such courses as English, economics, accounting, statistics, etc., which will fit into the upper division program of his chosen school. Such a plan will permit him to make up sophomore technical subjects when he begins his professional training.

Training for High-School Teaching

Xavier University offers training for high-school teaching in the academic fields and physical education. The work of teacher-training is coordinated through the Department of Education of Xavier University.

The well-prepared high-school teacher must have an intimate knowledge of the subject matter in the field or fields in which he intends to teach, in addition to the actual possession of those professional skills and techniques essential to success in the classroom.

A knowledge of the subject matter in the field or fields in which the student intends to teach is acquired while he is meeting the requirements for the several degrees offered. The necessary professional techniques and background are developed through the inclusion of certain basic courses in educational theory and practice offered by the Department of Education. Courses in education permit a desirable specialization in the program of the arts, science or philosophy degree student who plans to teach. These courses also provide the basic prerequisites to graduate work for the Master of Education degree in most universities.

Basic Courses in Education. Ed 31, 32, 101, 102 and 103 are required of all students who plan to teach at the high-school level, or to present education as a field of specialization in fulfillment of degree requirements, or to take graduate work in education.

Additional Courses in Education. In addition to the basic courses in education required of all undergraduates specializing in this field, additional courses must be elected by the individual student from the offerings of the department to strengthen this specialty to the extent necessary for meeting degree requirements or state certification requirements in the state where he expects to teach. Completion of the basic courses in education as outlined above, if five hours of credit are presented in practice teaching, will satisfy the minimum requirements of the Ohio State Department of Education for the provisional high-school certificate. An additional course in education, however, is necessary to satisfy degree requirements for a related or unrelated minor.

Consultation Necessary. Careful program planning by the student who intends to apply for a state certificate to teach in high school is essential in order that specific academic and professional requirements of the particular state may be fully satisfied. For this reason the student is encouraged to consult the Chairman of the Department of Education early in his college work to secure guidance in outlining a curriculum which will meet degree and certification requirements.

The student desirous of meeting professional requirements of another state should obtain an official statement of specific requirements from the State Department of Education of his respective state before consulting the chairman of the department.

Approved Curricula

The following outlines are intended as guides to the preparation of individual student programs of study. Departmental advisers and students are urged to check all student programs in detail for:

1. Correct course levels — lower division or upper division
   *(Upper division courses may not be taken before the completion of lower division courses.)*

2. Correct catalogue numbers of courses
   *(Incorrect numbering will entail difficulty after registration.)*

3. Correct number of semester hours of credit yielded by each course

4. The maximum number of semester hours of credit permitted per semester at the respective class level — freshman, sophomore, junior or senior.

In exceptional cases, special permission to take an additional course may be granted only at the discretion of the dean.

For the convenience of all offices concerned, alphabetical listing of catalogue numbers should be consistently followed.

### Departments of Instruction

The courses of instruction are numbered in accord with a unified plan. Lower division courses are numbered 1 to 99. Within the lower division the numbers 30 to 99 generally indicate that the course is open to sophomores. Upper division courses are numbered from 100 to 199. Double numbers indicate that the first semester course is prerequisite to the second semester course and that both must be satisfactorily completed to obtain credit for either course. Any exceptions will be stated in course descriptions. In most departments the courses are grouped in decades according to sequence, content, or some other plan of sub-division. In computing minimum requirements for a major, the 199 course may not be counted.

### Accounting (Ac)

These courses in accounting are designed to provide intensive training of comprehensive nature for the adequate preparation of public, private or industrial accountants, auditors, credit analysts or general business executives thoroughly familiar with the latest and most satisfactory methods.

A fundamental knowledge of accounting, essentially valuable in business or in a professional capacity, is the goal of the elementary courses.
The advanced courses which elaborate on the theory and practice of accounts, business analysis, costs, auditing and specialized accounting culminate in preparation for C.P.A. examinations and for actual entrance into the field of public accountancy.

Accounting may be chosen either as a field of major or minor specialization.

For a B.S. in B.A. degree the following requirements pertain:

1. A minor sequence in accounting including Ac 51, 52, 161, 152, 155 and either Ac 157 or Ac 163.
2. A major including Ac 156, 157 and Ac 163 in addition to the required minor sequence.
3. A minor sequence in economics including Ec 33, 34, 107, 151, 161 and Ec 181.
4. Senior comprehensive review.

UNDERGRADUATE DIVISION

50. INTRODUCTORY ACCOUNTING. Three credit hours. A course similar to Ac 51, but especially designed for students deficient in the fundamental theory and practice of bookkeeping. Given at the Evening College.

51. PRINCIPLES OF ACCOUNTING. Three credit hours. A study of general accounting as applied to modern record-keeping for single proprietorships, partnerships, and corporations, supplemented with practical problems and practice sets providing actual experience with general and special journals and ledgers; the preparation of adjusting and closing entries; trial balances; work sheets, balance sheets and profit and loss statements.

Prerequisite: Ac 52.

152. INTERMEDIATE ACCOUNTING. Three credit hours. A further development of the practical aspects of accounting, illustrating accepted methods of valuation and depreciation; preparation of comparative reports and statement analyses. An explanation of the reasons for various accounting reports, co-ordinated with problems that stimulate the interest of students in research and extra-curricular study in accounting and related subjects. Prerequisite: Ac 51.

153. ADVANCED ACCOUNTING PROBLEMS. Six credit hours. Two semesters. Given at the Evening Division. Separate credit given for each course.

154. INDUSTRIAL ACCOUNTING. Three credit hours. 162. Analysis of Financial Statements. Three credit hours.

163. Auditing Principles. Three credit hours. A study of fundamental principles of auditing; procedure in the analysis and verification of accounts; preparation of working papers and compilation of reports. Prerequisite: Ac 155.

164. Auditing Principles. Two or three credit hours. Advanced study of problems of procedure through comprehensive practice materials based on an actual audit and supplemented by further study of the content, design and use of the accountant’s working papers and reports. Prerequisite: Ac 163.

165. C.P.A. Review. Six credit hours. Two semesters. Given at the Evening College.

166. Senior Comprehensive Review. Two credit hours. Required of all seniors majoring in accounting.

Biology (Bl)

This department aims to assist in the liberal education of the student and to contribute to his cultural background. Lectures and laboratory studies are intended to give him a knowledge of basic biological principles as well as a training in careful, thoughtful, and independent observation, experimentation, and scientific analysis of data. The courses also provide an adequate biological foundation for subsequent professional studies in medicine, dentistry, and allied fields.

Bl 1 and 2 cannot be taken for pre-medical or pre-dental requirements.

Bl 3 and 4 are required as an introduction to all upper division courses. In exceptional cases, Bl 1 may be considered as partial prerequisite fulfillment.

A major must include Bl 101, 112 and 199.

Classical Languages

Since the Greek and Latin languages are the direct media of acquaintance with unified ancient culture, only through a study of the literature of both languages can a complete concept be formed of the mythology, philosophy and oriental origins of this early western culture. The inter-relationship of the epic, drama, oratory, prose and poetry reveals the intimate influence of the Greek mind on the Roman mind. Hence, a major in either language should be supported by the literature of the other in order to preserve this natural unity of combined cultural content.

However, the student may choose one language to the exclusion of the other if he so desires.

Aside from the educative discipline of diction, structure, style and mental power of analysis involved in the processes of translation, each language contains a complete literature of rare cultural value best revealed through the powerful contrast of the pagan mind with the Christian mind.

Selection of courses for a major must be made on the advice of the chairman of the department.

Admission to upper division Greek courses requires two units of high-school Greek and the completion of two semesters of lower division work. A student having no high-school Greek must complete four semesters of lower division work. Exception is made for the English or history major who wishes to take Gk 181 and 185.

Upper division Latin courses presuppose four units of high-school Latin and two semesters of lower division work. A student having only two units of high-school Latin must complete four semesters of lower division work prerequisite to upper division courses. Exception is made for the English and history major desirous of taking Lt 181 and 185.

Students selecting courses to be submitted for the Master's degree must include the four survey courses — Ed 201, 203, 205 and 207 — in their programs. Students planning to present, as an area of concentration, 12 credit hours in elementary education, secondary education, educational guidance, or educational administration shall select courses in these fields. It is important, therefore, that approval for all courses selected for application to a given area of concentration be secured from the chairman of the department prior to registration.

It is the obligation of the department to imbue the student with a practical knowledge of the principles of effective composition; to acquaint him with the treasures of literature, and to foster sound critical literary judgment.

In En 3, 4, a first-year requirement, the student concentrates upon composition while he reads and analyzes narrative and expository prose.

En 31, 32, intended as introductory courses in English and American literature, are departmental requirements for graduation. It is recommended that the major or minor in English include En 111, 141, 150 and 180.

The student majoring in English will be expected to consult the chairman of the department at least once each semester. Ordinarily, En 199 will be completed during the final semester of study.

At Xavier, expression will be emphasized in all classes. Since ineffective expression indicates defective impression, instructors are to consider errors in English in the evaluation of recitations, papers, and tests. Corrective training may be required even of an upper-classman under exceptional circumstances.

### History and Political Science

The Department of History and Political Science offers a major toward the Bachelor's and Master's degrees. The former study requires seven semester courses beyond Hs 7-8 which are prerequisite to all upper division work, and includes of necessity Hs 194. The latter demands six courses beyond the introductory study of government, Po 1-2. In each a comprehensive examination qualifies the student for the undergraduate major.

History is studied as a liberal art for its primary value of training toward proper appreciation of human living. Its insistence on accurate detail, on proof, and on the relation of cause and effect, cultivates habits of mature judgment. It helps toward developing due respect and sympathy for others, and supreme regard for the final purpose of life.

Political science aims to produce a deep understanding of the functions and processes of political power, of the place of authority in society, of the use of freedom in human relations. Regard for institutional practice, to conserve freedom and employ sound social forces toward the perfecting of political action, is a prime purpose in this field. The American constitutional system will be given particular attention.

**Military Science (MS)**

**The R.O.T.C.**

A senior unit of the Reserve Officers' Training Corps is maintained at the University by the War Department.

The mission of this unit is to produce junior officers who have qualities and attributes essential to their progressive and continued development as officers in a component of the Army of the United States.

Every student who is a physically fit citizen of the United States, between the ages of fourteen and twenty-four, is obliged to take military science during the first two years of attendance. One year of military science is required of the student entering as a sophomore; none, of one entering as a junior or senior.

Application for exemption from military science may be made by a student who has had active service with the armed forces of the United States and who has been honorably discharged therefrom, or for reasons of physical disability. All claims of exemption accompanied by the evidence thereof must be filed in the office of the dean.

The complete program of instruction comprises four sessions of lower division or basic courses and four sessions of upper division or advanced courses.

The basic courses are designed to give the student basic military training which will benefit him and the military service if he goes into the army.

The advanced courses qualify a limited number of selected students for commissions in the Officers' Reserve Corps. Admission to MS 101 will depend upon the fulfillment of the following conditions:

1. The filing of a formal request with the Chairman of the Military Department within the dates annually announced.

2. The completion of MS 1, 2, 31 and 32. Equivalence of basic courses completed in service (for veterans) or in some other Reserve Officers' Training Corps Unit will be determined by the Chairman of the Military Department.

3. The demonstration of exceptional qualities of leadership and scholarship.

4. An agreement to perform six summer weeks of practical work at camp after the completion of MS 101 and 102. This work must be done under designated military supervision.

### Religion (RI)

It is a basic principle of Jesuit education that the moral and religious training of youth must go hand in hand with intellectual development. It is not enough merely to integrate fields of knowledge with religion by the introduction of religious and spiritual points of view. Formal instruction is also necessary if the student is to have a religious knowledge adequate for Catholic life and leadership.

Catholic students must complete these four basic religion courses: RI 10, 30, 31, 32.

In keeping with the religious purpose of the University, non-Catholic students are required to take RI 3 and 4. The content of these courses is such as to meet the desire for religious instruction without the elements of controversy.

### UNDERGRADUATE DIVISION
